Abstract

This is a short example to show the basics of using the Matemática Contemporânea template.

1   Introduction

We invite all participants to submit an extended abstract for the proceedings that will be published by Matemática Contemporânea. The extended abstract must have at most **six pages**. Its acceptance is subject to peer review, and the deadline for submission is March 15th, 2019.

Please prepare your extended abstract using the enclosed template that contains this text `lawcliques-extendedabst.tex`. Follow the guidelines of Matemática Contemporânea (check the site `http://mc.sbm.org.br`). In particular, the editors encourage submission of manuscripts in LATEX. Figures and Tables appearing in the paper should be numbered and referred to by their numbers.

Be sure to include as footnote the "keywords" and the "2000 AMS Subject Classification" of the work, that can be found in

$$https://mathscinet.ams.org/msc/msc.html.$$

One can include a primary classification followed by possibly one or more secondary classifications. The list of references [1, 2, 3] must be in alphabetical order by author's last names; abbreviations of names of journals and references to books should follow the standard form established by Mathematical Reviews.

Please send by email to `lawcg2018@eic.cefet-rj.br` a pdf file with your extended abstract until March 15, 2019 with the subject "Submission to Matemática Contemporânea - LAWCG 2018".

2   Conclusion

Please check the webpage: `http://lawcg2018.icomp.ufam.edu.br/publication`.
